

Andrew Wainwright

Started with the ITeC in 2000 on the New Deal programme, which was a route for getting unemployed people back into work, then embarked on an NVO Level 2 Installing IT Products with the hope of achieving this qualification and also full time employment.

After 8 weeks of intensive training at ITeC I was placed at Refurbit where within a year I had gained full time employment as an I.T. Technician and achieved my NVQ level 2 qualification. My job role as an I.T. technician required me to support not only my colleagues I.T. issues but also those of the general public.

Another year on at Refurbit and I had successfully completed my NVQ level 3 in Installing and supporting I.T. systems and also my D32/33 Assessors Award. My job role changed to that of an I.T. tutor where I started delivering an NVQ. I was responsible for delivering the NVQ level 2 in I.T. Services repair centre.

Having been a trainee at ITeC I have now gone full circle and returned to the ITeC as an I.T. Tutor. I am delivering the qualifications which I had achieved; these are Installing and Supporting I.T systems level 2 & 3. Currently I'm working towards achieving the BTEC I.T. practitioners award and have also recently achieved my full 730-7 certificate in teaching adult learners.
