

Chris Kerwin

Started with ITeC in 1996 on the Using & Supporting IT course

Following an initial training period at the ITeC I entered a work placement at South Holderness School where I was employed as an IT Technician. With the experience I gained there I was able to complete an NVQ level 2 in IT.

In 2000 I became employed at the Hull ITeC undertaking general IT technician duties and help desk support. During this time I completed my NVQ level 3 in IT and the Advanced Modern Apprenticeship.

Following on from this I moved in to a training role at Refurbit and have recently completed my Assessors Award and completed the 730-7 Teacher Trainer certificate.

“Work based learning was far more interesting and varied than studying in a 6th form college and suited my learning style”
